MPS SERVICE PROVIDER CLARANET PORTUGAL

CASE STUDY

claranet

Organization: CLARANET PORTUGAL **Sector:** ISP/Managed Service Provider

Location: Lisbon, Portugal

Solution: MPS SP- Mail Protection Service for Service Providers

Founded in 1996, Claranet evolved from an innovative and pioneering ISP (Internet Service Provider), and it is today an independent, market leader Managed Services Provider.

Claranet provides managed Hybrid IT services, in the areas of Hosting, Public Cloud, Networks, Applications, Security and Workplace. Today it has more than 1,800 employees in 8 countries (United Kingdom, Portugal, Brazil, France, Germany, The Netherlands, Spain, and Italy), 21 offices and 37 data centers, of which 5 in Portugal.

Claranet was recognized as Leader in the Gartner Magic Quadrant for Managed Hybrid Cloud Hosting, in Europe (2017), for the fifth consecutive year.

THE CHALLENGE OF PROVIDING AN EFFICIENT EMAIL SECURITY SERVICE

Claranet provides its customers with AnubisNetworks' email security service, the MPS-Mail Protection Service for Service Providers, for filtering and risk and threat management in the corporate email.

This service allows its corporate customers the customized security management, by integrating the MPS with any email platform, whether or not hosted/serviced by Claranet . It also allows 24x7 proactive support and monitoring, which results in a safer solution and higher productivity for its customers.

In this long-standing partnership of excellence Claranet, using its systems architects and other teams, ensures joint efforts with AnubisNetworks' technical teams in order to build the ideal Email Security solution, with high availability, information privacy, and an engaging service to ensure Claranet customers, the safeguard of the entire corporate email ecosystem.

"The AnubisNetworks' solution is paramount for us to be a considerable and efficient player in the area of Email Security, meeting the strict quality criteria that we establish in the service provided to our customers."

The AnubisNetworks' Mail Protection Service for Service Providers solution:

The AnubisNetworks's MPS SP solution is an e-mail security platform intended for complex environments and has been designed from scratch to meet the specific needs of Telecom Operators and MSSPs.

The MPS Multitenant architecture allows ISPs to offer SaaS email security solutions, either from clusters located on its premises or through third-party clouds. These security services can be delivered to end consumers directly or through resellers and hosted partners, which contributes to the expansion of security services portfolio and the breadth of channel/OEM partners.

Main Benefits of Claranet Portugal:

Protection of its Customers

By ensuring that only legitimate emails are received and sent (important for the reputation management) and when configuring quota management, control and anti-botnet and anti-fraud functionalities, the MPS ensures the secure operation of companies' email ecosystem. In addition to this factor, the MPS ensures the appropriate availability and resilience for companies concerned with their email systems.

Increase Productivity of Claranet and its customers.

By optimizing the helpdesk operations, with delegated or centralized multitenant management, and with control of security mechanisms and management of personalized messages to different domains and users. For client companies' end-users are given various ways to manage the quarantine, namely through a web interface or simple periodic email digests.

Reduction of costs

With a transparent business model supported by a solid platform and with long-term advantages that include, for example, free upgrade of the software version, this solution is easily scalable and evolves with the infrastructure and the number of customers.
